## We Miniaturized the Elevator and Put It in a Bag!

Made of high quality stainless steel, the model Elevator Nanolift Plus is produced with your company's logo.

It consists of components that are produced in a 3D printer and comply with real-life products.

When you operate Nanolift Plus, the elevator cab moves like in a real elevator. The overdoor floor indicators will light up according to the direction of travel.

It is a plug-and-play system with electrical installation suitable for 110 VAC / 230 Vac, 50-60 Hz inputs.

### Other striking features of Nanolift Plus:

- ▶ Sliding automatic doors
- ▶ Voice announcement
- ▶ Realistic cab design

### Optional

You can buy Nanolift Plus with its special trolley case bag.

While this optional feature provides you with ease of use and carrying comfort, it also protects Nanolift Plus from impacts and scratches.
